

Put your (Mega) Minor Bench Burner into motion!!!!

Sometimes you want to be able to adjust the height of the Minor Bench Burner. This is certainly the case when you want to work with borosilicate tubes. As a result, STIPGLAS has developed the convenient STIP-connector. It's simple to mount on either the Minor or the Mega Minor Bench Burner.

The Minor Bench is now height-adjustable to any position.

But when the extra height isn't needed, you can work from the normal, low position.

Angle the burner downward when you want to work with a warming station.

Order right away! The price is €12,50 including tax and excluding shipping.

To order, send an email to stipglas@stipglas.com Pickup is also possible by appointment only.
